Subject: SETAC - reminder to indicate your preference for receipt of our work - Pesticide Risk Assessment for Pollinators
Attachments: SETAC Book Format Preference List - second wave (7-17-14).xlsx

All,

At the end of May I sent around a spread sheet around and asked everyone to indicate whether their preference is to receive a copy of our work, Pesticide Risk Assessment for Pollinators, as either an e-copy or hard copy.

I didn't receive a response from you and so, and providing this reminder.

On the attached excel file, please let me whether you prefer an e-copy or a hard copy. If you prefer a hard copy, please also provide a mailing address. (You'll note that the list I've attached is not the full list of the Pellston participants. It has been modified so that the addresses that I've received so far are protected from being sent around publically.)

I am compiling the preferences and sending it on to SETAC, who will send out the complementary copies.

The book is being distributed by Wiley, the publisher, see:

<http://www.wiley.com/WileyCDA/WileyTitle/productCd-1118852524,subjectCd-LSC0.html> .

Again, on behalf of Dave and I, congratulations to everyone.

Despite the time that has passed between the Workshop and now, the Pellston Workshop, without doubt, was a very important effort and a significant contribution, at a global level, to the protection of pollinators.

Kindest regards,
Tom Moriarty
